

Instrument Pilot Ground School (IPGS)

Introduction to fundamental principles of aviation theory and practical applications for flight in instrument meteorological conditions. Provides a core body of knowledge necessary to develop aviation-related problem solving, analytical, and decision-making skills. Knowledge of this course material, and passing the FAA written examination based on this knowledge, are prerequisites for obtaining an FAA Instrument Rating on your Pilot Certificate.

Directions: Class location to be provided with registration.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
